ROOK METERING EQUIPMENT, INC.

MICHAEL ENGINEERING LIMITED

Ram Flow

Ratios adjustable from 3.5:100 to 15:100

Accurate to within 1%

Output adjustable to more than 1 gallon per minute

Pumps directly from a 55-gallon drum.

Full performance, maximum simplicity, minimum price

The Ram Flow is a simple, yet highly capable, dispensing machine for dispensing two part, high viscosity materials. Using a Ram Flow eliminates weighing and mixing errors. Easy slide ratio adjustment simplifies to any necessary changes. Included is a convenient solvent flush system. The Ram Flow delivers a constant flow of accurately metered material through a static mix head. A spray gun is available for spray mold making.
